

CarListing Code

The image shows a VS Code editor window with a TypeScript file named `page.tsx` open. The file is part of a project structure visible in the Explorer sidebar on the left. The code in `page.tsx` defines a `Car` interface, a `CategoryClient` component, and a `useEffect` hook for fetching car data. The Run and Debug sidebar on the right is also visible, showing the current state of the application. The status bar at the bottom indicates the file is in the `Ln 135, Col 44` position, with 2 spaces, UTF-8 encoding, and CRLF line endings. The editor is using the TypeScript JSX and Prettier extensions.
